Internet Issues Remaining

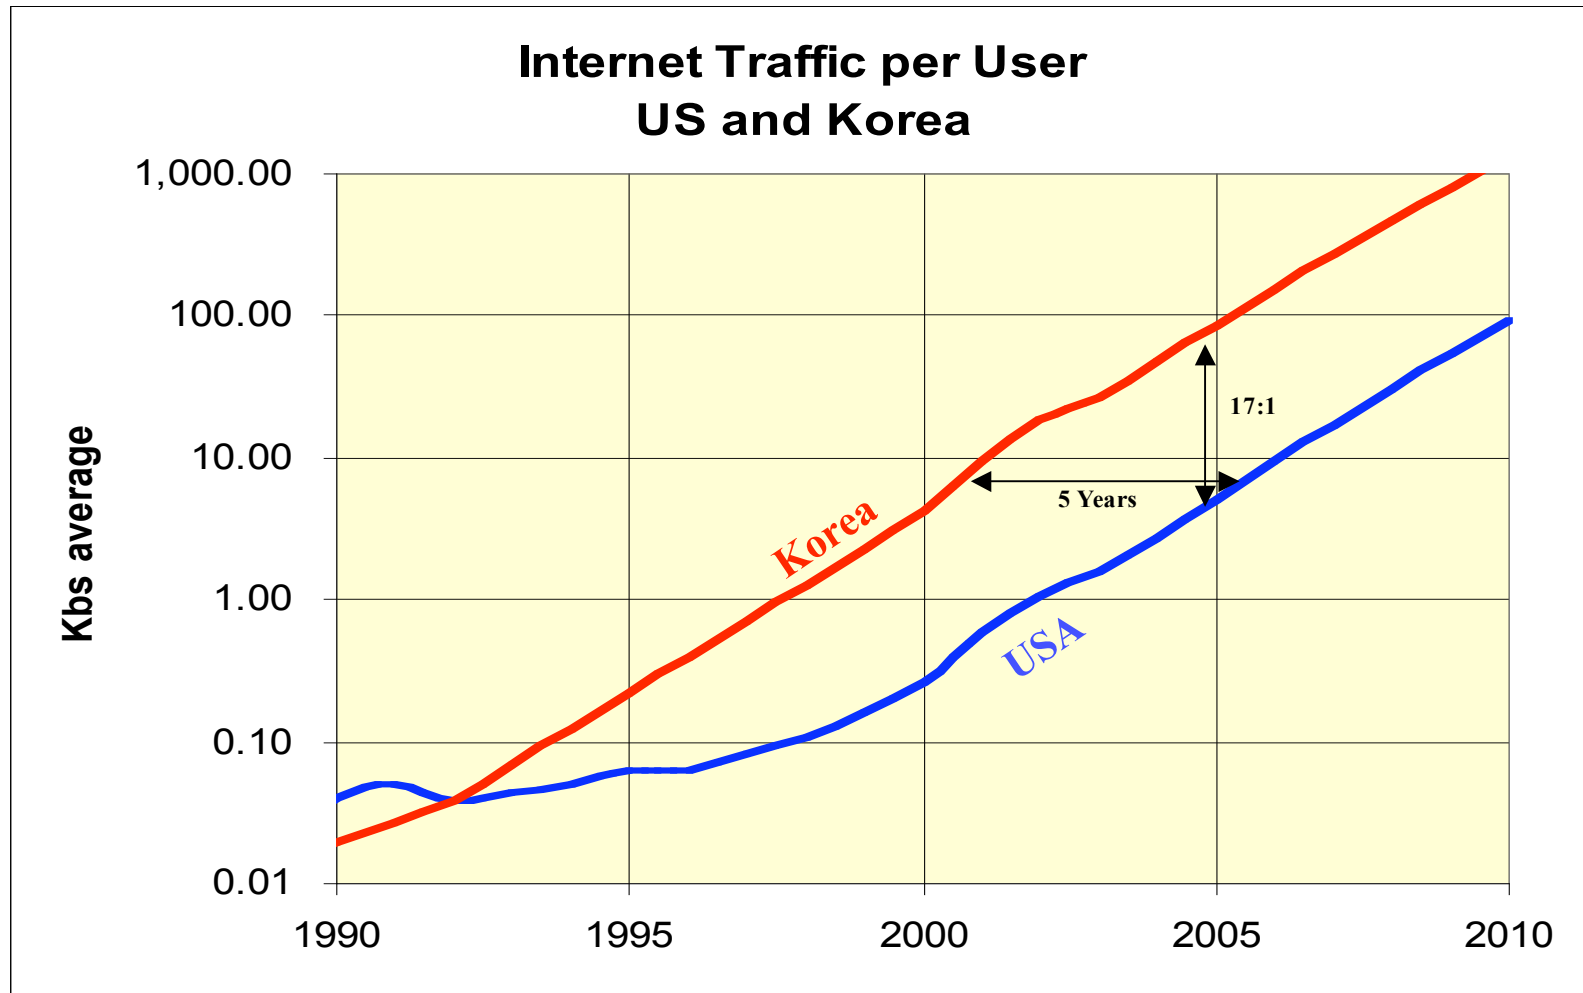

✚ Broadband Access

✚ Equal Access with Over-subscription (P2P)

✚ QoS for Video, Voice, Streaming

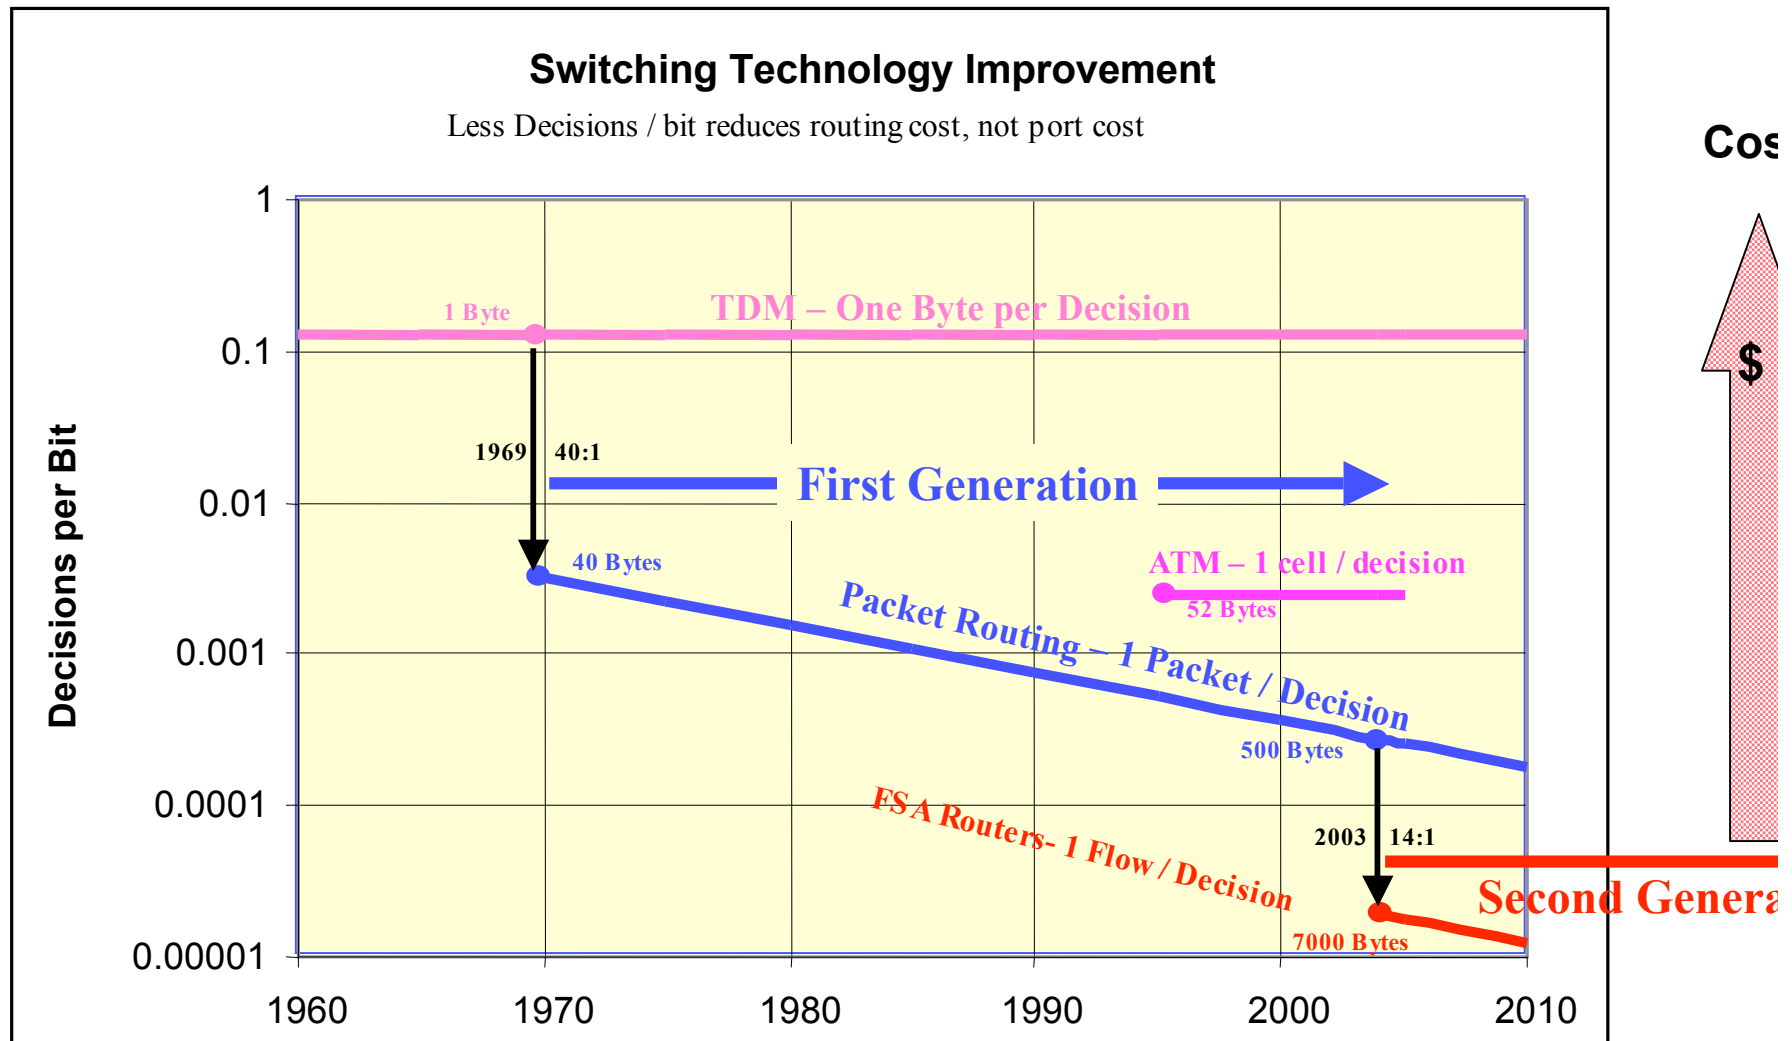

✚ Security

Lack of Broadband Access in US

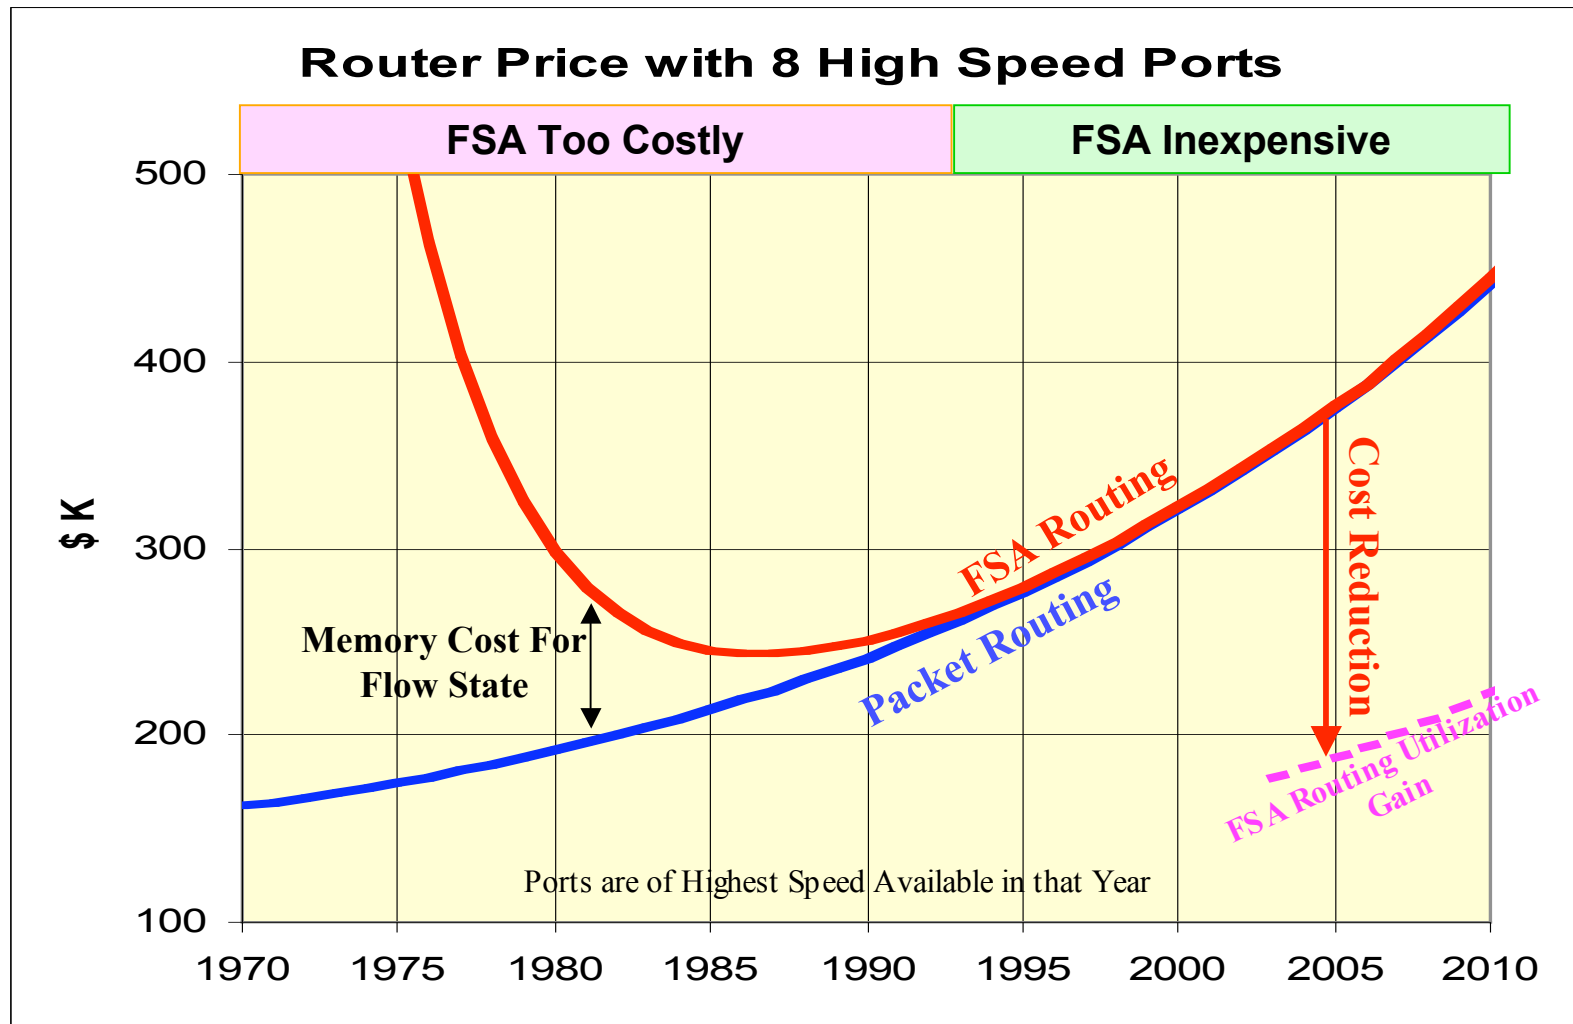

The US lack of broadband access has severely handicapped the US Internet market and slowed the development of applications like video education

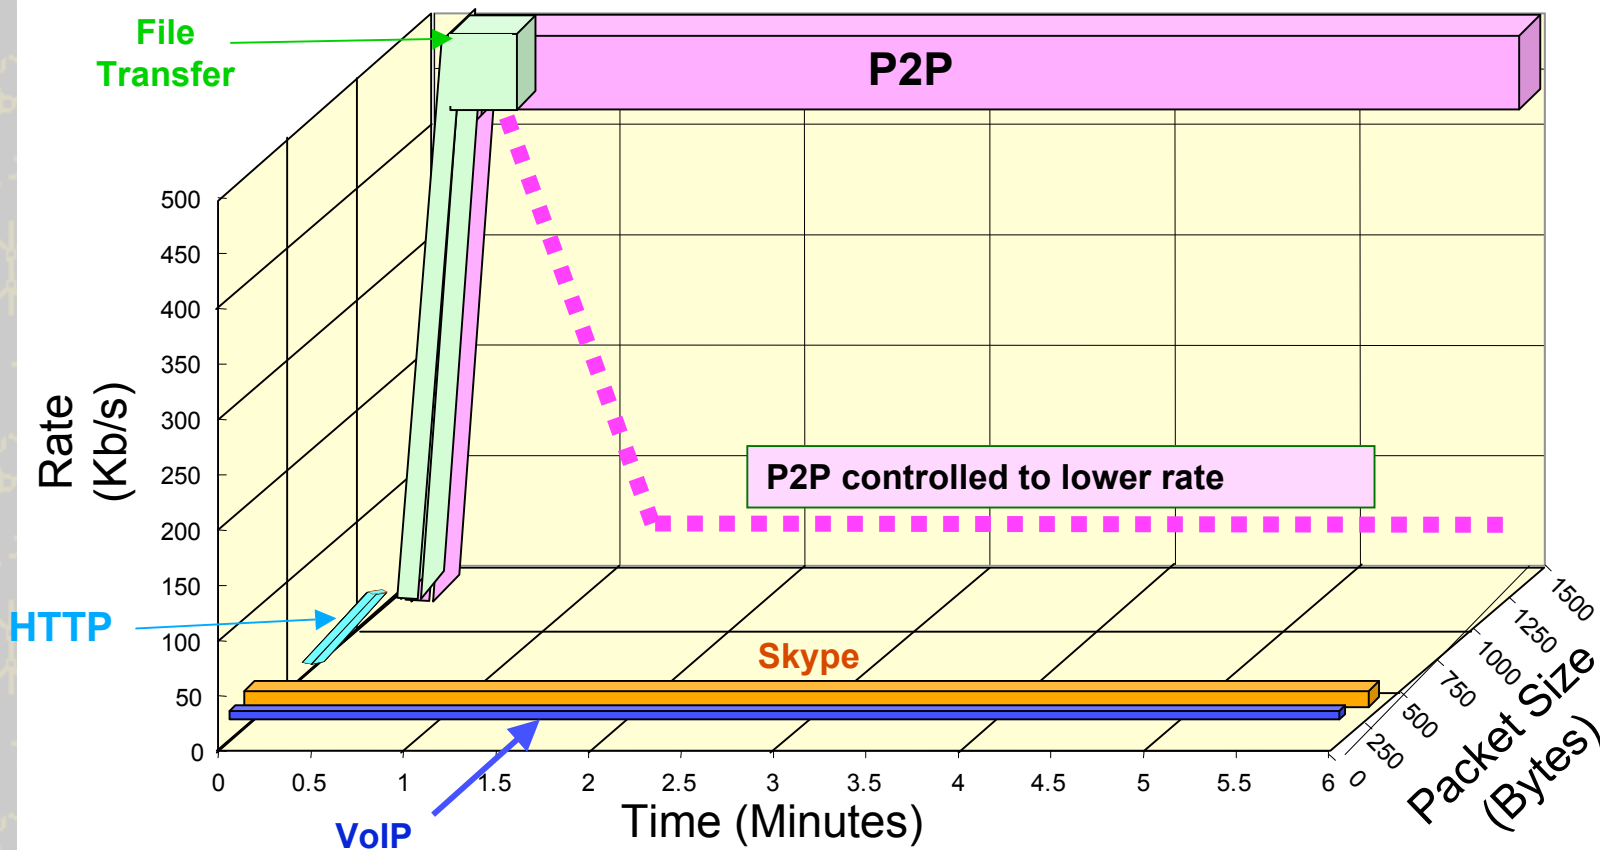

Switching History – Byte, Packet, Flow

Economics of FSA Routing

Flow State Aware – Can Identify & Control

Dimension

- Rate
- Total Bytes
- Total Time
- Packet Size
- Port
- Protocol
- DiffServ

Controls

- Rate
- Priority
- Delay Variance
- Loss Rate

Flow State provides information about each flow

This permits the router to identify the type of traffic over time

Enables control of the rate, delay, or loss allowed for that flow
